TODOs

- No space before and after multicols

- less padding left and right

- More space around lists, less space between entries, use of vfill

- Automatically insert subsection title on each slide, avoid line break in title

- Arrange content vertically centered and use more space on top

- heading moves upwards when more content is added

- overview pages when sections/chapters start

- avoid path to titlepage

- nice table of contents

DONE

- Make footer more readable
